DETAILED ACTION

Allowable Subject Matter

1. Claims 1-30 are allowed. Applicant is thanked for the interview of April 28th with Darrell Pogue where a discussion of the claim and the previous USC 112 rejection took place to clarify the intentions of the claim language.
2. The following is an examiner's statement of reasons for allowance:
3. The concept of measuring a variable (multiple times if necessary) and adjusting parameters of a production process based on a process model is well known (See Stoddard). The use of a reference wafer for further testing of wafer production dimensions and criteria is also well known. However, since when reading the claims in light of the specification, as per MPEP § 2111.01 or In re Sneed, 710 F.2d 1544, 1548, 218 USPQ 385, 388 (Fed. Cir. 1983), none of the references of record alone or in combination disclose or suggest the combination of limitations specified in the independent claims, specifically multiple process reference wafers having been generated at a first point in time (discussed in paragraphs 0065 and 0068), conducting the process on multiple process reference wafers at different points in time, and determining whether a deviation exists between the first and second measurements done at different times on different process reference wafers – then adjusting the process variables (paragraph 0066). It is these multiple reference wafer measurement and production steps, in combination with the remaining elements and features of the invention, that the applicant's invention defines over the prior art of record.

Art Unit: 2125

4. Claim 11 was specifically looked at for the potential of being "software per se" as noted in the specification in paragraph 0076, however, the system conducts measurement steps which must be done with a metrology tool, so these claims cannot be 100% executed in software and do not qualify as software per se.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
